## FOREWORD

\*\*

In 1936 I began copying inscriptions from Barry County cemeteries. At that time I was advised to arrange them alphabetically. Later it was decided they should be typed in the order in which they were copied. Feeling that the first ones have some value I have indexed them.

The Hastings or Riverside Cemetery inscriptions are from the penciled abstract of Mr. Clarence Burton in the Burton Historical Collection of the Detroit, Michigan Public Library, which I was permitted to copy.

The list of cemeteries contains such facts as I was able to glean from items in the "History of Allegan and Barry Counties, Michigan" by Ensign 1880.

Inscriptions grouped together are from stones on one lot. Those bracked together are on the same stone.

Abbreviations used are: dau - daughter;  
wf - wife  
ae - age  
b - born  
d - died or days  
y - years  
m - months

# PRAIRIEVILLE CEMETERY, PRAIRIEVILLE TWP., BARRY CO., MICH.

Prairieville Cemetery is located just outside the village of Prairieville to the north on Section 2. The sexton has no records before 1930 except for 3 burials in 1903. It was used in common by the townships of Orangeville & Prairieville until the Brown Cem. in Orangeville was laid out. The oldest stone is that of George Campbell d. March 31, 183? ae 34y. The last figure was indecipherable but was probably 7, 8 or 9 as p. 472 in "Allegan and Barry Counties, Michigan" states "In 1835 Nicholas and William Campbell with their families and an unmarried brother settled on Section 25". The first death in the township was that of Mrs. Eli Waite in the late spring or early summer of 1836. Other early burials were Wm. A. Bowne and Lucinda Nye. George and William Campbell are buried in adjoining graves.

## LINDSEY CEMETERY, PRAIRIEVILLE TWP., BARRY CO., MICHIGAN

The first death in Prairieville township was that of Mrs. Eli Wait on Nov. 1, 1836. She was buried on the east end of her husband's farm on Section 6, which has continued to be the family burying ground. The farm is now owned by their grandson, Eli Lindsey, whose parents and sisters are also buried here. It is about 3 miles west of Prairieville on the Pine Lake road, across the road to the east from a school house, <sup>It is</sup> in the woods and is reached by a lane.

# CATHOLIC CEMETERY, YANKEE SPRINGS TWP., BARRY CO., MICH.

This old burying ground is on the town line road between Yankee Springs & Orangeville Townships, a few rods west of the county road C-611. A fence, now almost gone, at one time enclosed this little plot. Bushes etc. show where graves are or were but the only tombstones are within the wire fence which encloses the Duffy family lot. For many years the only stone was that of Bridget Duffy but in the summer of 1940 the other three were set up. The following excerpt from a letter written Nov. 21, 1940 by Mr. J. C. Raymond of Middleville, Mich. to me (Ruth Robbins Monteith) is all that I have been able to learn of the history of this old cemetery. "Perhaps that is one of the oldest Cemeterys in the Co. and it was a Catholic Cemetery. There use to be a log Church right East of the Cemetery. I have seen it and been in it when I was a boy. I attended one funeral there and that was the old lady Duffy over 50 years ago. And there is probably 15 or 20 Bodies there but I do not know the names of all of them there is 5 of the Duffy family there 3 girls and Mr. & Mrs. Duffy and there is one Oconner girl and maybe two. And there is a man buried there by the name of Ronan. And there is a man there by the name of Beard. I think and there is 2 or 3 Babys burried there but I do not know their names.

Yes I think there were Bodies burried there before Bridget Duffy in 1851. The Priest use to come Frome Kalamazoo and hold meetings there in an early day.

There is 4 of the Duffy Family Burried in the Protistant Cemetery at Yankee Springs.

The youngest Duffy Boy is living and is a man 80 yrs old but hes not at home and if he lives to get home he can give me more Information. ---- Some of the bodys have been taken up from this Cemetery and taken to Kalamazoo."

Yankee Springs Cemetery, Yankee Springs Twp., Barry Co., Mich. 1

Yankee Springs Cemetery is in Section 35 just off of the Hastings - Orangeville road, and is back of the United Brethren Church. The land was given by William (Yankee Bill) Lewis in the early days of the settlement. The first burial was a Mr. Thomas, an employee of Mr. Lewis, The second burial was Mrs. William Coffin of Orangeville. (Allegan & Barry Co. 1880 p 517)

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry must be supported by a valid receipt or invoice, and that the records should be kept for a minimum of seven years. This is crucial for both internal auditing and for providing evidence in the event of a tax audit.

2. The second part of the document outlines the procedures for handling discrepancies. If a discrepancy is identified, the first step is to verify the original source of the data. If the discrepancy is found to be a clerical error, it should be corrected immediately. If it is found to be a more significant issue, such as a misclassification of an expense, it should be reported to the appropriate authority for further investigation.

3. The third part of the document discusses the importance of regular reviews. It is recommended that all records be reviewed at least once a year to ensure that they are up-to-date and accurate. This review should be conducted by a person who is not directly involved in the day-to-day operations, to ensure objectivity.

4. The fourth part of the document discusses the importance of maintaining confidentiality. All records should be stored in a secure location, and access should be restricted to authorized personnel only. This is to prevent unauthorized disclosure of sensitive information, which could have serious consequences for the organization.

5. The fifth part of the document discusses the importance of training. All personnel involved in the record-keeping process should receive regular training to ensure that they are up-to-date on the latest procedures and regulations. This training should cover both the technical aspects of record-keeping and the ethical aspects of maintaining confidentiality.

6. The sixth part of the document discusses the importance of documentation. All procedures and policies should be documented in writing, and these documents should be kept in a secure location. This is to ensure that the organization has a clear and consistent set of guidelines to follow, and to provide a reference for future training and audits.

7. The seventh part of the document discusses the importance of communication. It is essential that all personnel involved in the record-keeping process are kept informed of any changes to the procedures or policies. This can be achieved through regular meetings, newsletters, or other communication channels.

8. The eighth part of the document discusses the importance of compliance. The organization must ensure that it is compliant with all relevant laws and regulations, including those related to record-keeping and confidentiality. This requires a thorough understanding of the applicable laws and a commitment to following them to the letter.

9. The ninth part of the document discusses the importance of transparency. The organization should be open and honest about its record-keeping practices, and should be willing to provide information to external auditors or regulators when requested. This is to build trust and to demonstrate the organization's commitment to high standards of accountability.

10. The tenth part of the document discusses the importance of continuous improvement. The organization should regularly evaluate its record-keeping practices and make improvements as needed. This can be done through the use of feedback from personnel, through regular audits, or through the use of new technologies and tools.

# HILL CEMETERY, YANKEE SPRINGS TWP., BARRY CO., MICHIGAN

This is the burying ground of the Luther Hill family who came to Barry County in the fall of 1834 from Gates, Monroe County, New York. In 1838 Calvin Hill built a home on his farm and later in a little grove of evergreens nearby Orange son of C. & S. Hill was buried, the first grave in this private cemetery. The farm is in Section 11 Yankee Springs township just west of Hill's Corners about 3 miles north of Yankee Springs on the Middleville road. The old farm home is still standing but in a rundown condition.

## COMAN CEMETERY, YANKEE SPRINGS TWP., BARRY COUNTY, MICHIGAN

The Coman Cemetery is on the south east corner of Section 4. The sexton has a plat but it is quite incomplete. He has no record of early burials. It is kept in better condition than the other Yankee Springs cemeteries but is newer. The inscription of earliest date is 'Ladd Headley, Benjamin d. Apr. 20, 1843. Those grouped together are buried on the same lot. Copying was begun in the N.E. corner and followed row by row.

THEORY OF THE EARTH AND ITS HISTORY

1. The Earth is a sphere, and its surface is covered by water and land. The land is divided into continents and islands. The water is divided into oceans and seas.

2. The Earth is divided into four main parts: North America, South America, Europe, and Asia. Africa is also a continent, but it is often considered as a separate part of the world.

3. The Earth is divided into many smaller parts called countries or states. These are often named after the people who live there.

4. The Earth is divided into many smaller parts called cities or towns. These are often named after the people who live there.

5. The Earth is divided into many smaller parts called villages or hamlets. These are often named after the people who live there.

6. The Earth is divided into many smaller parts called farms or fields. These are often named after the people who live there.

7. The Earth is divided into many smaller parts called houses or cottages. These are often named after the people who live there.

8. The Earth is divided into many smaller parts called streets or roads. These are often named after the people who live there.

9. The Earth is divided into many smaller parts called rivers or streams. These are often named after the people who live there.

10. The Earth is divided into many smaller parts called mountains or hills. These are often named after the people who live there.

11. The Earth is divided into many smaller parts called forests or woods. These are often named after the people who live there.

12. The Earth is divided into many smaller parts called lakes or ponds. These are often named after the people who live there.

13. The Earth is divided into many smaller parts called islands or archipelagos. These are often named after the people who live there.

SPONABLE or  
VALLEY HOME CEMETERY, HASTINGS TWP., BARRY CO., MICHIGAN 1

This cemetery has been called variously Sponable, Valley Home or merely Hastings Township Cemetery. It is <sup>Section 27</sup> about 3½ or 4 miles south east of Hastings on a little to the north of M 7 9. It is well kept. Copying was begun to the right of the gate the south side taken first row by row. The north side was taken from the rear to the front. Inscriptions were copied in August 1940 by Ruth Robbins Monteith.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that this is crucial for the company's financial health and for providing reliable information to stakeholders.

2. The second part of the document outlines the specific procedures for recording transactions. It details the steps from initial entry to final review, ensuring that all necessary information is captured and verified.

3. The third part of the document addresses the role of the accounting department in this process. It highlights the need for clear communication and collaboration between different departments to ensure the accuracy and completeness of the records.

4. The fourth part of the document discusses the importance of regular audits and reviews. It explains how these processes help to identify any discrepancies or errors and ensure that the records are up-to-date and accurate.

5. The fifth part of the document provides a summary of the key points discussed. It reiterates the importance of accurate record-keeping and the role of the accounting department in this process.

6. The final part of the document includes a section for additional notes or comments. This area is intended for any other relevant information that may arise during the process of maintaining accurate records.

1. The first part of the paper discusses the importance of understanding the underlying mechanisms of the observed phenomena. This is followed by a detailed analysis of the data, which shows a clear trend towards higher values in the later stages of the experiment. The results are then compared with previous studies, highlighting the similarities and differences. Finally, the paper concludes with a summary of the findings and suggestions for future research.

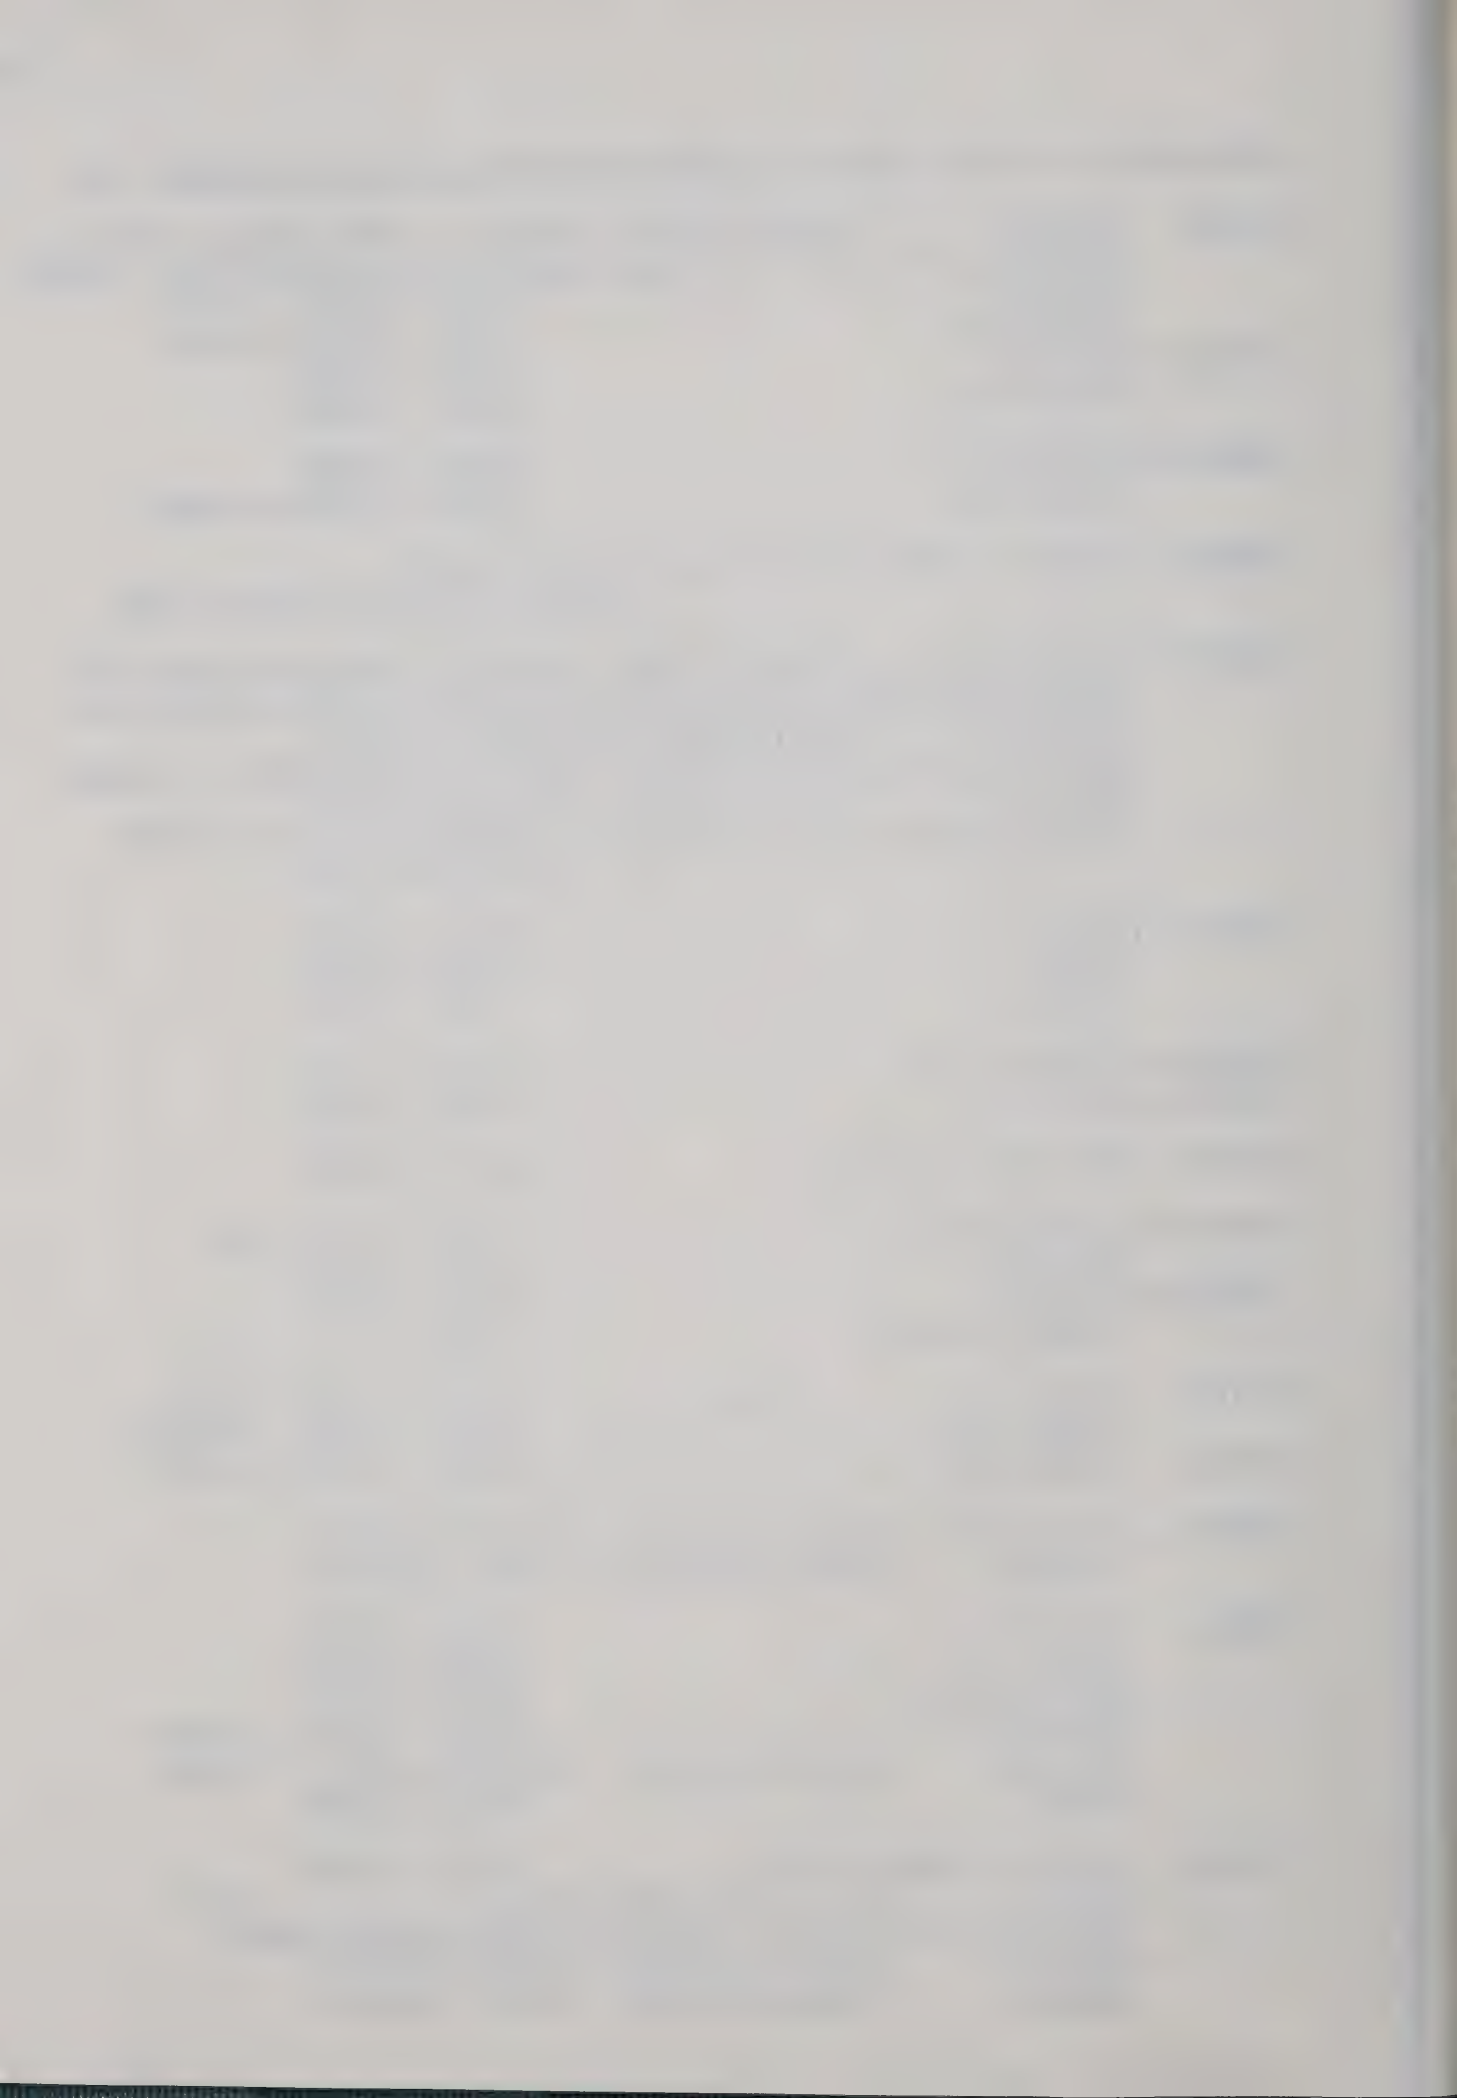

2. The second part of the paper focuses on the theoretical aspects of the problem. It starts with a review of the existing literature, followed by a presentation of the author's own model. The model is based on the assumption that the system is in a state of equilibrium, and it predicts that the observed behavior can be explained by the interaction of the various factors. The model is then tested against the experimental data, and it is found that it provides a good fit to the observations.

3. The third part of the paper discusses the practical implications of the findings. It shows that the results have important consequences for the design of the system, and that they can be used to optimize the performance. The paper also discusses the limitations of the study, and it suggests ways in which the results can be applied in practice. Finally, the paper concludes with a summary of the key points and a list of references.

4. The fourth part of the paper is a conclusion. It summarizes the main findings of the study and highlights the key points. It also discusses the implications of the results and suggests ways in which they can be applied in practice. Finally, the paper concludes with a list of references.

TO THE EDITOR:  
I am writing to you to inform you of the results of my research on the properties of the new material I have discovered. The material has many unique properties and I believe it will be of great value to the scientific community. I have attached a copy of my report for your review.

I am sure that your expertise will be helpful in evaluating the results of my research. I am looking forward to hearing from you soon. Please let me know if you need any further information.

Very truly yours,  
[Signature]

Enclosed is a copy of my report. I have also attached a copy of the data I collected during my experiments. I hope this information will be helpful to you.

I am sure that your expertise will be helpful in evaluating the results of my research. I am looking forward to hearing from you soon. Please let me know if you need any further information.

1. The first part of the paper is devoted to a general discussion of the problem of the existence of solutions of the system of equations

$$\begin{cases} \Delta u = f(x, y, u, v) \\ \Delta v = g(x, y, u, v) \end{cases} \quad (1)$$

where  $f$  and  $g$  are continuous functions defined in a domain  $D$  of the  $xy$ -plane, and  $u$  and  $v$  are functions of  $x$  and  $y$  defined in  $D$ .

It is assumed that the functions  $f$  and  $g$  satisfy the conditions

(A)  $f$  and  $g$  are continuous in  $D$  and satisfy the Lipschitz condition

$$|f(x, y, u, v) - f(x, y, u', v')| + |g(x, y, u, v) - g(x, y, u', v')| \leq L(|u - u'| + |v - v'|) \quad (2)$$

where  $L$  is a constant. It is also assumed that the functions  $f$  and  $g$  satisfy the condition

$$f(x, y, u, v) = 0, \quad g(x, y, u, v) = 0 \quad (3)$$

where  $u$  and  $v$  are functions of  $x$  and  $y$  defined in  $D$ .

The second part of the paper is devoted to a study of the problem of the uniqueness of solutions of the system of equations

$$\begin{cases} \Delta u = f(x, y, u, v) \\ \Delta v = g(x, y, u, v) \end{cases} \quad (4)$$

where  $f$  and  $g$  are continuous functions defined in a domain  $D$  of the  $xy$ -plane, and  $u$  and  $v$  are functions of  $x$  and  $y$  defined in  $D$ .

It is assumed that the functions  $f$  and  $g$  satisfy the conditions

# IRVING CEMETERY, IRVING TOWNSHIP, BARRY COUNTY, MICHIGAN 1

Irving Cemetery, in Sec. 33 on the south side of old M-37 on a high bank, was laid out in 1846. The first burial was that of Mrs. WM. COLE on Jan. 1, 1847. AMOS INGRAHAM, a soldier of the Revolutionary War, is buried here. He died Aug. 11, 1838 and was first buried on the Ingraham farm but later was moved here.

These inscriptions were taken near the gate. They are but a fraction of the stones in this cemetery. I had no opportunity to return and complete the copying.

The first part of the paper is devoted to a study of the properties of the function  $f(x)$  defined by the equation  $f(x) = \sum_{n=0}^{\infty} a_n x^n$ , where  $a_n$  are the coefficients of the power series. It is shown that  $f(x)$  is a continuous function of  $x$  and that it satisfies the functional equation  $f(x) = f(x^2) + x$ .

In the second part of the paper, we consider the problem of the representation of a continuous function  $f(x)$  of a real variable  $x$  in the form of a series of the type  $\sum_{n=0}^{\infty} a_n \phi_n(x)$ , where  $\phi_n(x)$  are certain functions. It is shown that such a representation is possible if and only if the function  $f(x)$  satisfies certain conditions.

The third part of the paper is devoted to a study of the properties of the function  $f(x)$  defined by the equation  $f(x) = \sum_{n=0}^{\infty} a_n x^n$ , where  $a_n$  are the coefficients of the power series. It is shown that  $f(x)$  is a continuous function of  $x$  and that it satisfies the functional equation  $f(x) = f(x^2) + x$ .

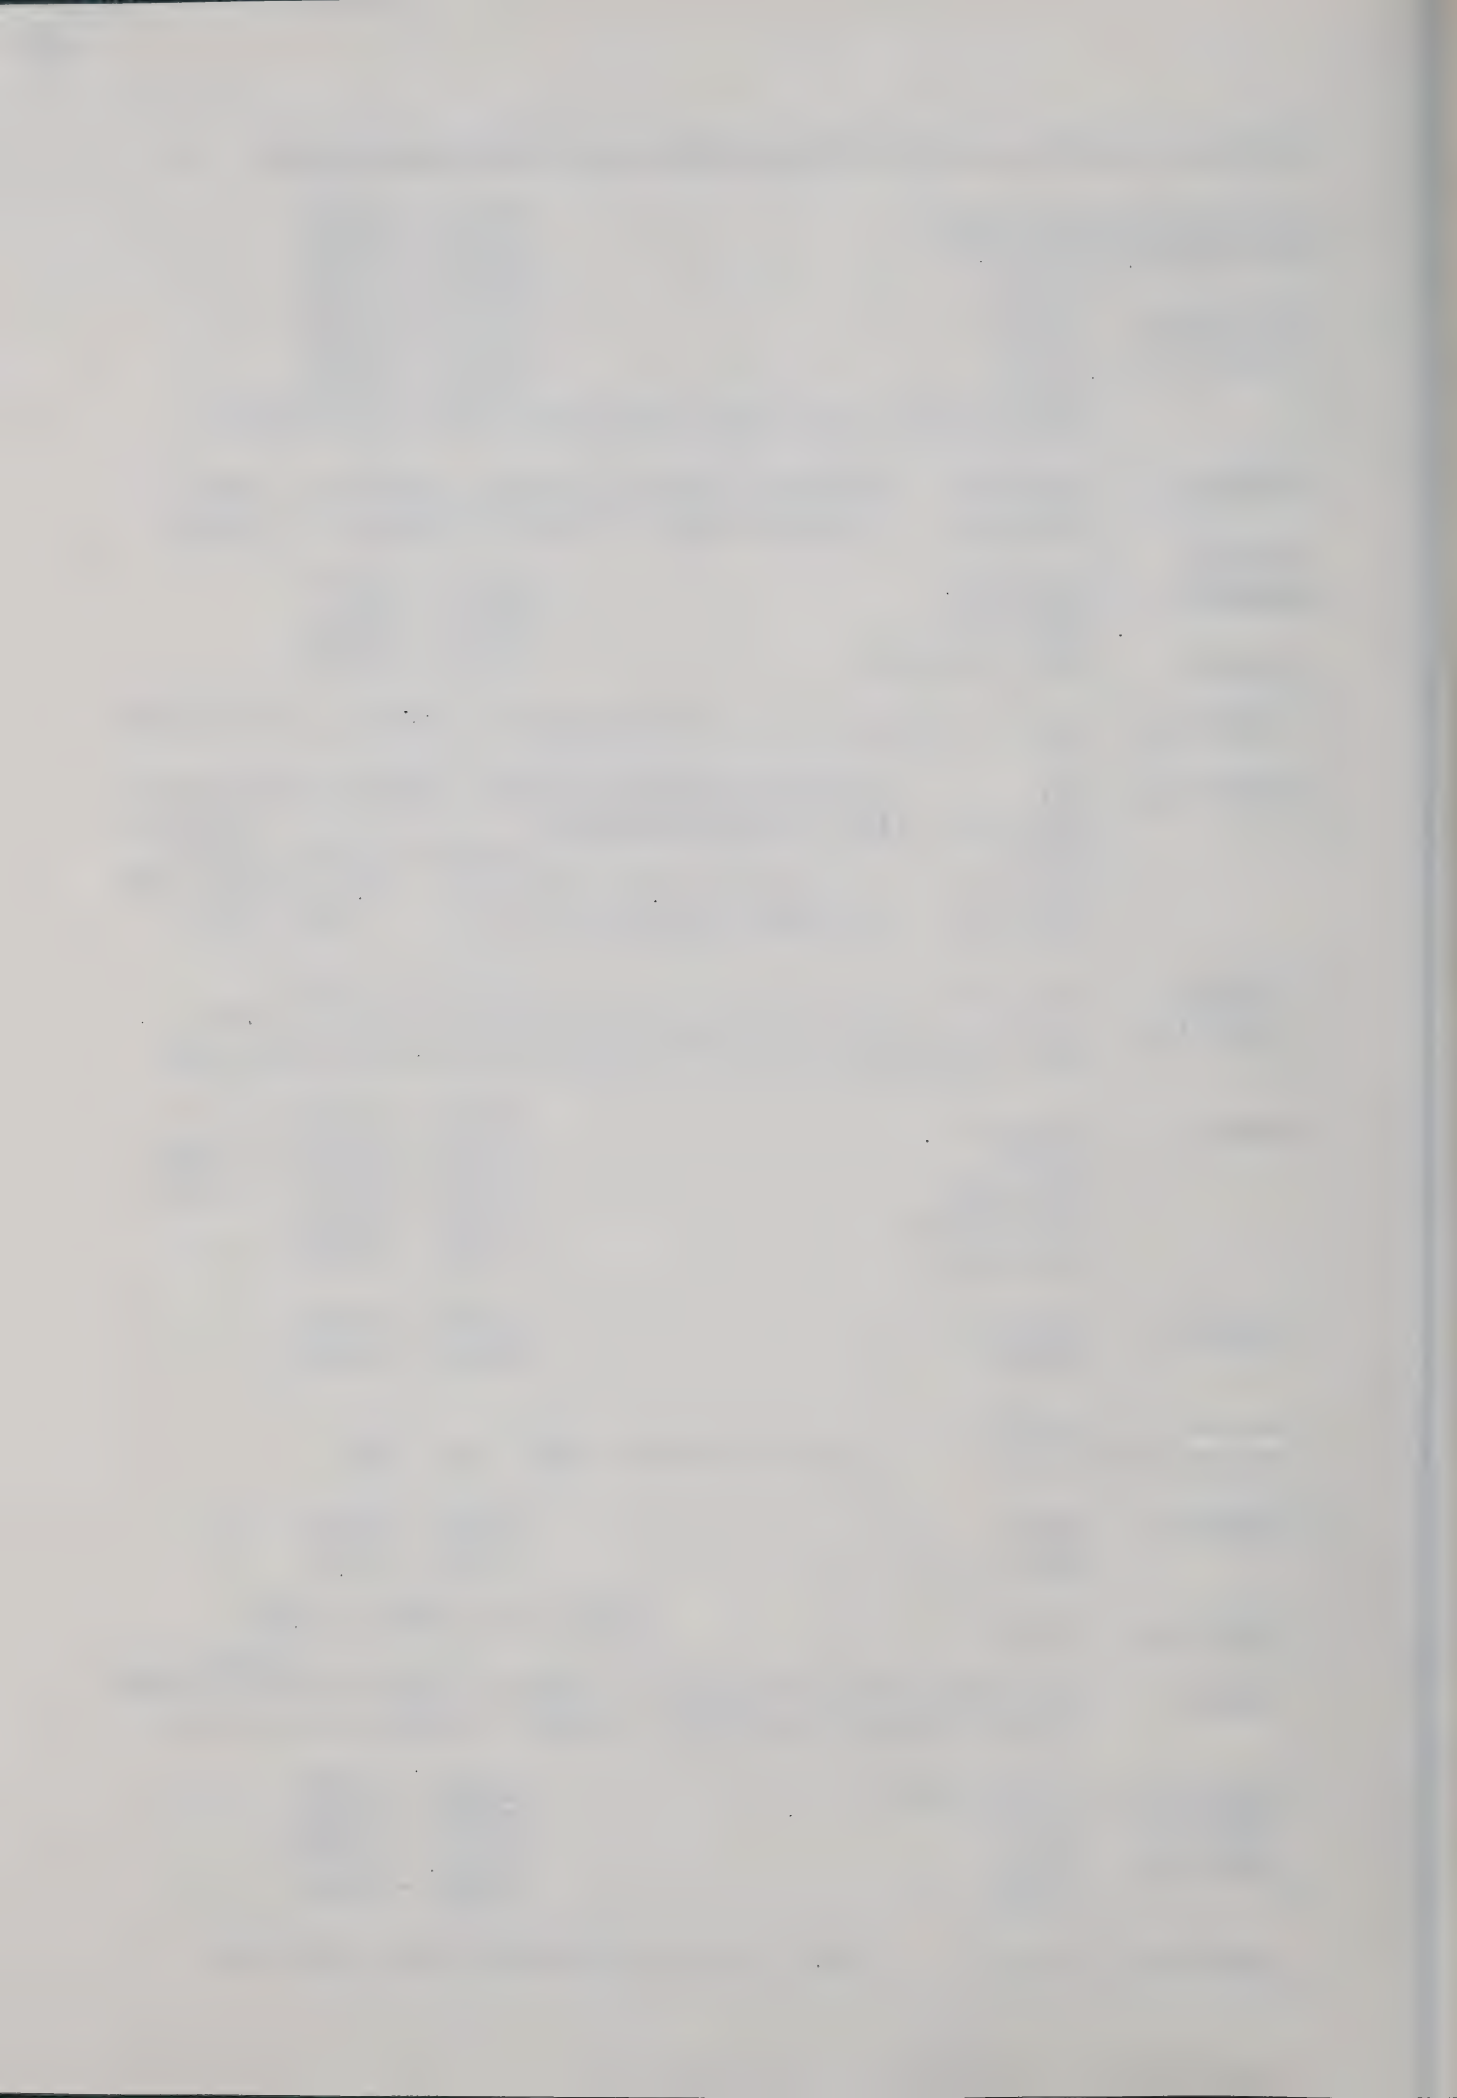

In the fourth part of the paper, we consider the problem of the representation of a continuous function  $f(x)$  of a real variable  $x$  in the form of a series of the type  $\sum_{n=0}^{\infty} a_n \phi_n(x)$ , where  $\phi_n(x)$  are certain functions. It is shown that such a representation is possible if and only if the function  $f(x)$  satisfies certain conditions.

The fifth part of the paper is devoted to a study of the properties of the function  $f(x)$  defined by the equation  $f(x) = \sum_{n=0}^{\infty} a_n x^n$ , where  $a_n$  are the coefficients of the power series. It is shown that  $f(x)$  is a continuous function of  $x$  and that it satisfies the functional equation  $f(x) = f(x^2) + x$ .

In the sixth part of the paper, we consider the problem of the representation of a continuous function  $f(x)$  of a real variable  $x$  in the form of a series of the type  $\sum_{n=0}^{\infty} a_n \phi_n(x)$ , where  $\phi_n(x)$  are certain functions. It is shown that such a representation is possible if and only if the function  $f(x)$  satisfies certain conditions.

Handwritten text in a cursive script, likely a letter or document. The text is written in dark ink on a light background. The first line is partially cut off at the top. The text appears to be a personal communication, possibly a letter to a friend or family member. The handwriting is fluid and characteristic of the 18th or 19th century.
